OPERATIONAL MANAGEMENT CONSULTANCY

WHAT WE DO?

Our customized solutions will help to achieve the lowest possible cost-to-serve, enable meeting productivity, improvement goals and timeliness.

- Driving value overall as quality improvement, cost cutting and lead-times reduction
- Bringing consistency to operations in multiple facilities
- Reduction in waste, downtime, rejection and interruptions.
- Improving performance, OEE and life cycle of system
- Developing KPI/KPR for measuring the performance of your organization
- Adopting best practices of manufacturing industries

CHALLENGES FOR INDUSTRIES

The major challenge is gaining competitive advantage. To do that one would need to update their technology, value addition, cost efficiency & quality. Aim to shorten cycle time, reach higher productivity and work on the safety of our environment & health.

Success depends on committed leadership, a well trained team with clear objectives and organizational capabilities.

Operational excellence helps inculcate discipline and better people engagement within organizations and stresses the application of a variety of principles, system and tools for eliminating waste & hassle free production, cutting cost, quality product on sustainable basis.

OBJECTIVES

- To understand interruptions & reduce errors and defects in process
- To reduce cost, cycle and time and to identify and drive out waste
- Creating a framework to ensure 100% productivity and to simplify operations making them easier to manage
- To help in producing global standard product / services & exceed your customer expectations
- To develop knowledge and skills that will generate continual value in production
